

Installation

1. Install the XAMPP PHP development environment by going to <https://www.apachefriends.org/index.html>
2. Download the contents of <https://github.com/Spagecko/ConnectBand/tree/master> repository
3. Drag and The contents into the HTdocs in your Xampp folder
4. Once XAMPP is installed, start the Apache and MySQL services by clicking "Start"

This is what should be shown in the control panel.

5. While the servers are running, phpmyadmin should be accessible at <http://localhost/phpmyadmin/> or appropriate Port Number

Configuration

1. Create a database named “connectband” in the database tab of phpmyadmin.

Databases

 **Create database** 

Database	Collation	Action
<input type="checkbox"/> information_schema	utf8_general_ci	 Check privileges
<input type="checkbox"/> mysql	latin1_swedish_ci	 Check privileges
<input type="checkbox"/> performance_schema	utf8_general_ci	 Check privileges
<input type="checkbox"/> phpmyadmin	utf8_bin	 Check privileges
Total: 4	latin1_swedish_ci	

  Check all With selected:  Drop

2. Download the SQL script from <https://github.com/Spagecko/ConnectBand/blob/master/connectband.sql> and import “connectband.sql”.

File to import:

File may be compressed (gzip, bzip2, zip) or uncompressed.
A compressed file's name must end in **.[format].[compression]**. Example: **.sql.zip**

Browse your computer: connectband.sql (Max: 2,048KiB)

You may also drag and drop a file on any page.

Character set of the file:

3. The database should now be populated as shown on the left hand side.
